MESSAGE

I am glad to know that Biodiesel Association of India (BAI) is planning to publish a souvenir on "Climate Change and Biodiesel 2008" to create greater awareness on various Biofuels related issues.

I am sure the initiative taken up by BAI to encourage Biofuels manufacture and usage of Biofuels, especially Biodiesel, will ensure sustainable agricultural growth, rural development, energy security and equal opportunity for the masses along with overall environmental protection.

I wish all success to the organizers.
